

ZBI CASE PRESENTATIONS

Full-Arch Rehabilitation for Failing Dentitions - The Dentally Exhausted Patient

ON-DEMAND CE VIRTUAL PROGRAM

PROGRAM DESCRIPTION:

The clinical cases to be presented in this program will include treatment solutions for full-arch rehabilitation for failing dentitions in the dentally exhausted patient, including a step-by-step approach to the planning and fabrication of full-arch fixed provisional and definitive prostheses. Each case will include clinical records, radiographs, models, photographs, the treatment plan accepted by the patient, the step-by-step treatment carried out, as well as, the materials and technologies used that are relevant to each patient treatment. At the completion of each case presentation, the clinical perspective of the treating clinician will be summarized to include: key takeaways from the treatment; a discussion of the most successful aspect of the treatment; and how the same treatment type might be performed differently today.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Identify candidates for full-arch rehabilitation for failing dentitions in the patient who is dentally exhausted from endless dental treatments.
- Illustrate specific step-by-step protocols for the fabrication of immediate full-arch provisional prostheses following the guidelines for the DIEM[®] 2 Protocol.
- Through clinical case examples, evaluate clinical parameters such as lip support, phonetics, and aesthetics of provisional prostheses prior to fabrication of definitive prostheses.
- Illustrate the prosthodontic and laboratory procedures for design and fabrication of definitive prostheses with BellaTek[®] Frameworks.

Carl Drago, DDS, MS, FACP

Dr. Drago received his dental degree from Ohio State University College of Dentistry and a Master's Degree from the University of Texas Graduate School of Biomedical Sciences at San Antonio, Texas. Dr. Drago is a Diplomate of the American Board of Prosthodontics, a Fellow in the American College of Prosthodontists and the American College of Dentists. He has more than 90 published articles and has written five textbooks on dental implants. Dr. Drago currently serves as the Clinical Science section editor for the Journal of Prosthodontics. He is an Adjunct Associate Professor in Graduate Prosthodontics at Marquette University School of Dentistry and maintains a private practice limited to fixed, removable, and implant prosthodontics in Brookfield, Wisconsin.

ADA CERP[®]

Continuing Education Recognition Program

Zimmer Biomet Dental is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at ADA.org/CERP.

Zimmer Dental Inc.
Nationally Approved PACE Program
Provider for FAGD/MAGD credit.
Approval does not imply acceptance by
any regulatory authority or AGD endorsement.
01/01/2021 to 12/31/2022
Provider ID# 208673

REGISTRATION AND CANCELLATION POLICY: Registration is limited to practicing clinicians. Zimmer Biomet Dental reserves the right to cancel or substitute this program.

TRANSPARENCY REPORTING: All payments and "transfer of value" items provided to health care providers will be reported as required by federal and state laws and regulations. "Transfer of value" items include meals and continuing dental education credits. *The fair market value of this complimentary program will be reported as required under any transparency laws applicable in your region. In the USA, the reportable value per credit hour is USD \$50.

DISCLAIMER: Participants must always be aware of the hazards of using limited knowledge in integrating new techniques or procedures into their practice. Only sound evidence-based dentistry should be used in patient therapy. The information in this course is of a general nature and does not represent or constitute medical advice or recommendations and is for dental education purposes only. Zimmer Biomet Dental does not practice medicine or dentistry. Each clinician should exercise his or her own independent judgment in the diagnosis and treatment of an individual patient, and this course and information does not purport to replace the comprehensive training clinicians have received.
