

ZBI LIVE CASE PRESENTATIONS

Implant Therapy for the Edentulous Patient

COMPLIMENTARY LIVE CE VIRTUAL PROGRAM

PROGRAM DESCRIPTION:

The clinical cases to be presented in this program will demonstrate implant treatment for the edentulous patient. Proper treatment planning and the decision-making process is key to achieving predictable outcomes for clinical treatment of patients with implant-supported full-arch fixed provisional and definitive prostheses. The clinical cases to be presented in this program will include treatment solutions for immediate full-arch restorations to meet patient demands and expectations, including a step-by-step approach to the fabrication of the prostheses. The procedures will be presented and explained, using clinical records, radiographs, models, and photographs. The criteria for selection of materials and technologies, and alternatives, will be discussed as they are relevant to each case. At the completion of each case presentation, the clinical perspective of the treating clinician will be summarized to include: key takeaways from the treatment; a discussion of the most successful aspect of the treatment; and how the same treatment type might be performed differently.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- List the components and materials needed for fabrication of an immediate full-arch provisional restoration.
- List specific step-by-step protocols for the fabrication of immediate full-arch provisional prostheses following the guidelines for Revitalize® Patient Solutions.
- Evaluate clinical parameters such as lip support, phonetics, and aesthetics of provisional prostheses prior to fabrication of definitive prostheses.
- Illustrate the prosthodontic and laboratory procedures for design and fabrication of definitive prostheses.

Geoffrey Cunningham, DDS, MS, FACP

Dr. Cunningham received his DDS and his MS in Prosthodontics from West Virginia University in Morgantown, West Virginia. He is a Diplomate with the American Board of Prosthodontics and is the current owner and president of a prosthodontics practice in Durham, North Carolina. His practice focuses on reconstructive dentistry where he typically treats patients requiring complex multidisciplinary rehabilitation involving implant, fixed, and removable prosthodontics. Dr. Cunningham lectures nationally and is an Adjunct Professor at the University of North Carolina at Chapel Hill.
