

Puros[®] Cancellous Particulate Allograft

The Natural Choice For Healthy Bone Growth

1 Proven, Predictable Regeneration

Acts as an osteoconductive scaffold for new bone formation^{1,2}

In large-volume applications, prospective studies have documented faster bone regeneration at six months than grafts containing sintered bovine bone matrix^{3,4}

In small-volume applications, regeneration of hard bone has been reported as early as 3-5 months^{5,7}

3 Tutoplast[®] Process

Sterilized and preserved using the proprietary Tutoplast process, Puros Cancellous Particulate is a high-quality allograft designed for large and small volume bone regeneration procedures

2 Natural And Easy To Use

Retains osteoconductive properties due to the preservation of the natural bone matrix collagen and mineral composition, trabecular pattern, and original porosity,^{1,2} enabling the ingrowth of vascular and cellular connective tissue⁶

Easy handling – quick hydration, five-year shelf life and room temperature storage

ZIMMER BIOMET
Your progress. Our promise.®

The Bone Grafting Material Of Choice For Many Clinicians Due To Its History Of Well-Documented Clinical Results

Clinical Advantages Of Puros Cancellous Particulate Allografts

Puros Cancellous Particulate Allografts have shown successful clinical results in:

- Regeneration of periodontal bone and furcation defects^{1,2}
- Osseous defect regeneration^{1,2,4,7}
- Regeneration of extraction sockets^{5,6}
- Regeneration of gaps around block grafts^{5,8}
- Horizontal alveolar crest augmentation^{5,8}
- Sinus augmentation^{3,4}

The Unique Tutoplast Process

The proprietary Tutoplast process assures the highest standard of tissue safety and quality.⁹

The process preserves the valuable collagen matrix and tissue integrity while inactivating pathogens and gently removing unwanted materials, such as cells, antigens and viruses.⁹ The result is safe, biocompatible tissue.⁹

For over 40 years, a variety of Tutoplast processed tissues have been safely used in more than three million procedures.⁹

Delipidization

Osmotic treatment

Oxidative treatment

Solvent dehydration

Low-dose gamma irradiation

Ordering Information

Catalog Number	Description
68210	Puros Cancellous Particulate, 0.5 cc, 250-1000 µm
68211	Puros Cancellous Particulate, 1 cc, 250-1000 µm
68209	Puros Cancellous Particulate, 2 cc, 250-1000 µm
68212	Puros Cancellous Particulate, 0.5 cc, 1000-2000 µm
68213	Puros Cancellous Particulate, 1 cc, 1000-2000 µm
68214	Puros Cancellous Particulate, 2 cc, 1000-2000 µm

Zimmer Biomet Dental offers a comprehensive line of allografts for bone augmentation needs.
