

ZBI LIVE CASE PRESENTATIONS

Delivering Implant Restorations

COMPLIMENTARY LIVE CE VIRTUAL PROGRAM

PROGRAM DESCRIPTION:

The clinical cases to be presented in this program will demonstrate techniques for developing aesthetic abutment contours for the delivery of various anterior and posterior implant-supported restorations. The presentation will include step-by-step protocols for seating abutments, tightening retaining screws to the appropriate torque values; application, and methods for minimizing excess cement, as well as, procedures for obtaining ideal occlusion. The procedures will be presented and explained, using clinical records, radiographs, models, and photographs. The criteria for selection of materials and technologies, and alternatives, will be discussed as they are relevant to each case. At the completion of each case presentation, the clinical perspective of the treating clinician will be summarized to include: key takeaways from the treatment; a discussion of the most successful aspect of the treatment; and how the same treatment type might be performed differently.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Describe techniques for developing abutment contours that are aesthetic and hygienic, and may be seated easily and predictably.
- List the torque values specified for typical screws for Zimmer Biomet restorative components and describe the methods available to deliver implant screws into abutments.
- Describe techniques for identifying and correcting errors in interproximal and occlusal contact areas.
- List and describe choices for cements to lute restorations to abutments.
- Describe methods to safely remove excess cement from implant restorations.

Edward R. Schlissel, DDS, MS

Dr. Schlissel received a dental degree from State University of New York at Buffalo and a Materials Science degree from Stony Brook University, College of Engineering and Applied Sciences, in New York. He is a Fellow of the Academy of General Dentistry and a member of the Academy of Osseointegration. Dr. Schlissel is Professor Emeritus of General Dentistry, School of Dental Medicine at Stony Brook University, where he was Chair of the Department of General Dentistry and Director of the General Practice Residency Program. He currently maintains a private practice in Marietta, Georgia with an emphasis on adult restorative dentistry.
