

Accelerated Treatment Protocol Using Digital Technologies: Part 1 Surgery

ON-DEMAND CE VIRTUAL WEBCAST

PROGRAM DESCRIPTION:

In this program, a digital workflow from “A to Z” will be performed demonstrating how to digitally plan for a surgical guide and taking it to final restoration within ONE month, by combining digital technologies with a Trabecular Metal™ Dental Implant. In this program, participants will understand how cases can be completed in a minimal amount of time. This is Part 1 in a two-part series. In this program, participants will view the complete digital workup that enables virtual case planning for implementing digital technologies into the practice. Given the cutting-edge nature of the procedures and services presented in this program, participants will be given the ability to watch the virtual planning session along with a guided surgical procedure.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Understand the digital workflow with the definitive restoration in mind.
- Virtually plan a case using Implant Concierge’s digital platform.
- List the benefits of guided surgery.
- Comprehend the benefits of the Trabecular Metal Implant.

Jason Kim, DDS, MDSc, FAAID, DABO/ID

Dr. Jason Kim completed his Periodontal training and received a Master’s certificate from Rutgers School of Dental Medicine, Dept. of Periodontics. He is now Clinical Assistant Professor in the Dept. of Periodontics at Rutgers School of Dental Medicine. He is also Clinical Assistant Professor at NYU College of Dentistry, Implantology Program. Dr. Kim was also appointed to Dean’s Faculty at University of Maryland School of Dentistry. He is a Diplomate with the American Board of Oral Implantology, a Fellow with the American Academy of Implant Dentistry, and also a Diplomate of the International Congress of Oral Implantologists.
