

Puros[®] Blend Particulate Allograft

Natural Blend. Proven Processing.

The Best of Both Worlds.

1 The Natural Mix For Bone Growth

Puros Blend Particulate Allograft is an anatomic-based mix of cortical and cancellous bone particulate which combines the space maintenance of cortical bone and the rapid remodelling of cancellous bone

3 A Trustworthy Source

Safety and performance you may expect from the Puros brand

Single-donor vials

Two particulate sizes to accommodate different defect sizes

2 Easy To Use

Retains osteoconductive properties due to the preservation of the natural bone matrix collagen and mineral composition, trabecular pattern and original porosity¹

Easy handling—quick rehydration, five-year shelf life and room-temperature storage

No need to mix on site

Puros Blend Particulate Allograft

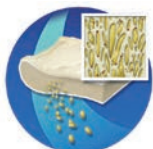

Sterilized and preserved using the proprietary Tutoplast® process, Puros Blend Particulate Allograft is a high-quality allograft designed for large and small volume bone regeneration procedures.

The Unique Tutoplast Process

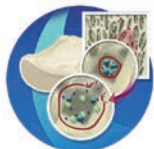

The proprietary Tutoplast process assures the highest standard of tissue safety and quality.

The process helps preserve the valuable collagen matrix and tissue integrity while inactivating pathogens and gently removing unwanted materials, such as cells, antigens and viruses. The result is safe, biocompatible tissue.

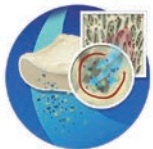

For over 40 years, a variety of Tutoplast processed tissues have been safely used in more than five million procedures.¹

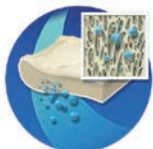

Delipidization

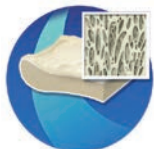

Osmotic treatment

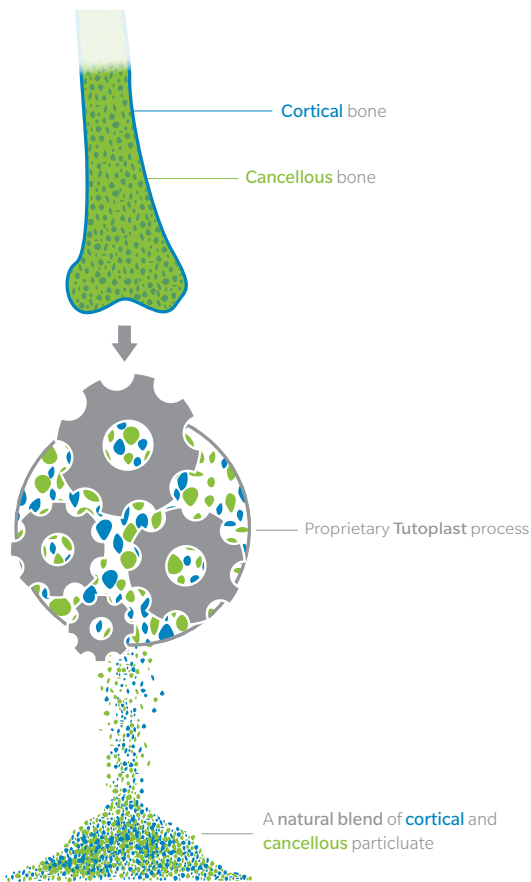

Oxidative treatment

Solvent dehydration

Low-dose gamma irradiation

Ordering Information

Catalog Number	Description
67800	Puros Blend Particulate, 0.5 cc, 250-1000 µm
67801	Puros Blend Particulate, 1 cc, 250-1000 µm
67802	Puros Blend Particulate, 2 cc, 250-1000 µm
67803	Puros Blend Particulate, 0.5 cc, 1000-2000 µm
67804	Puros Blend Particulate, 1 cc, 1000-2000 µm
67805	Puros Blend Particulate, 2 cc, 1000-2000 µm
