

Immediate and Definitive Restorations of the Edentulous Arch-Transitioning from the Provisional Restoration to the Definitive: Laboratory Perspective

ON-DEMAND WEBCAST

PROGRAM DESCRIPTION:

Patients with debilitated or missing dentitions often seek rehabilitation to quickly regain masticatory function, aesthetics, and quality of life. Clinicians can now predictably offer treatment solutions for immediate full arch restorations to meet patient demands and expectations. This is followed by the design, fabrication, and delivery of the definitive prosthesis. This program will present a step-by-step approach to fabrication of the provisional restoration as well as the definitive restoration, from a laboratory perspective.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Understand the technique of indirectly fabricating a provisional prosthesis following the guidelines for RevitaliZe® Patient Solutions.
- Learn the laboratory techniques for fabrication of the definitive prosthesis.
- Understand the requisite information to provide to the laboratory for fabrication of the definitive prosthesis.
- Identify the materials used for fabrication of the definitive prosthesis.

Henry Martin, CDT

Henry's technical experience includes all aspects of Dental Technology, with an emphasis on dental implants, as dental implant restorations have become a specialty of his laboratory. With 37 years of experience, advanced training, and extensive experience in most systems and procedures, his knowledge extends into clinical and as a result he has been involved in hundreds of immediate load full arch restorations, guided surgery, and CT-based case planning. Henry is past President of the National Association of Dental Laboratories, twice served as Chairman of the National Board for Certification in Dental Technology, is Past President of the Southeastern Conference of Dental Laboratories, a past President of the South Carolina Dental Laboratory Association, and past Trustee for the Foundation for Dental Technology. He is a member of the Editorial Board for the Journal of Dental Technology, as well as the American Academy of Cosmetic Dentistry, American College of Prosthodontics and the Academy of Osseointegration.

ADA CERP®
Continuing Education Recognition Program

Zimmer Biomet Dental is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at ADA.org/CERP.

Zimmer Dental Inc.
Nationally Approved PACE Program Provider
for FAGDMAGD credits.
Approval does not imply acceptance by
any regulatory authority or AGD endorsement.
01/01/2019 to 12/31/2020
Provider ID# 208673

REGISTRATION AND CANCELLATION POLICY: Registration is limited to practicing clinicians. Zimmer Biomet Dental reserves the right to cancel or substitute this program.

TRANSPARENCY REPORTING: All payments and "transfer of value" items provided to health care providers will be reported as required by federal and state laws and regulations. "Transfer of value" items include meals and continuing dental education credits. *The fair market value of this complimentary program will be reported as required under any transparency laws applicable in your region. In the USA, the reportable value per credit hour is USD \$50.

DISCLAIMER: Participants must always be aware of the hazards of using limited knowledge in integrating new techniques or procedures into their practice. Only sound evidence-based dentistry should be used in patient therapy. The information in this course is of a general nature and does not represent or constitute medical advice or recommendations and is for dental education purposes only. Zimmer Biomet Dental does not practice medicine or dentistry. Each clinician should exercise his or her own independent judgment in the diagnosis and treatment of an individual patient, and this course and information does not purport to replace the comprehensive training clinicians have received.
