

# Optimization of Restorative Workflows through Digital Innovation

ON-DEMAND WEBCAST

## PROGRAM DESCRIPTION:

This program designed for the dental team, will explore current digital technologies and their potential for enhancing dental implant treatment. Information needed to design a custom implant restoration will be discussed, followed by impression methods, including a simplified impression protocol for fabrication of patient-specific implant-supported restorations. The benefits of using an intraoral digital scanner for data capture will be reviewed, as well as, the benefits for patients and the practice. Design principles for CAD/CAM abutments and aesthetic restorations will be presented.

**Program Fee**  
Complimentary

**CE Credit**  
1

## PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Develop a strategy for using new digital technologies in their practices to achieve more predictable and efficient patient outcomes.
- Understand a simplified impression protocol for fabrication of implant-supported restorations with an intraoral scanner or traditional impression procedures.
- Comprehend several new digital technologies available for fabricating patient-specific implant-supported restorations.
- Understand CAD/CAM abutment design using the BellaTek® Encode® Impression System.

## Sompop Bencharit, DDS, MS, PhD, FACP

Dr. Bencharit is an Associate Professor and the Director of Digital Dentistry Technologies in the Department of General Practice at the Virginia Commonwealth University (VCU) School of Dentistry; and the Department of Biomedical Engineering at the VCU College of Engineering. He received his DDS and Diploma in Prosthodontics from Chulalongkorn University, Bangkok, Thailand. Dr. Bencharit earned a Certificate and Master Degree in Prosthodontics, a PhD in Oral Biology, and a Certificate in Clinical Research from the University of North Carolina at Chapel Hill. He is a Diplomate of the American Board of Prosthodontics and a Fellow of the American College of Prosthodontists. Dr. Bencharit established the Virginian Commonwealth University Center of Digital Dentistry and the pre-doctoral CAD/CAM Dentistry Curriculum and Clinic. He limits his clinical practice to digital dentistry, dental implants, prosthodontics, and esthetic dentistry. Dr. Bencharit published more than 60 peer-review articles and 100 abstracts. He lectures nationally and internationally on various topics from 3D printing and guided implant surgery, to digital dentistry, and more.

**ADA CERP®**  
Continuing Education Recognition Program

Zimmer Biomet Dental is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at [ADA.org/CERP](http://ADA.org/CERP).

Zimmer Biomet Dental  
Nationally Approved PACE Program  
Provider for FAGD/NIAGD credit.  
Approval does not imply acceptance by  
any regulatory authority or AGD endorsement.  
1/1/2019 to 12/31/2020  
Provider ID# 208673

**REGISTRATION AND CANCELLATION POLICY:** Registration is limited to practicing clinicians. Zimmer Biomet Dental reserves the right to cancel or substitute this program.

**TRANSPARENCY REPORTING:** All payments and "transfer of value" items provided to health care providers will be reported as required by federal and state laws and regulations. "Transfer of value" items include meals and continuing dental education credits. \*The fair market value of this complimentary program will be reported as required under any transparency laws applicable in your region. In the USA, the reportable value per credit hour is USD \$50.

**DISCLAIMER:** Participants must always be aware of the hazards of using limited knowledge in integrating new techniques or procedures into their practice. Only sound evidence-based dentistry should be used in patient therapy. The information in this course is of a general nature and does not represent or constitute medical advice or recommendations and is for dental education purposes only. Zimmer Biomet Dental does not practice medicine or dentistry. Each clinician should exercise his or her own independent judgment in the diagnosis and treatment of an individual patient, and this course and information does not purport to replace the comprehensive training clinicians have received.
