

Avoiding Complications in the Anterior Aesthetic Zone

ON-DEMAND WEBCAST

PROGRAM DESCRIPTION:

Achieving optimal, predictable results with implant restorations may be one of the most challenging goals in implant dentistry. This program will present several challenging clinical scenarios involving missing teeth, as well as the surrounding hard and soft tissues in the aesthetic zone. Preoperative planning will be emphasized as a means of avoiding or minimizing surgical and/or restorative complications. Critical diagnostic steps will be discussed, including fabrication of surgical guides to optimize implant placement. The literature is replete with clinical guidelines relative to provisional restorations being critical in obtaining optimal results; provisional restorations are also important regarding abutment selection and design features, as well as establishing contours of the definitive restorations. Clinical situations will be illustrated where implant placement and/or tissue contours were not ideal and additional surgical interventions and prosthodontic modifications were needed to resolve the complications.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Identify patients with potential clinical challenges regarding implant-supported restorations in the anterior aesthetic zone.
- Understand established clinical guidelines that manage complex treatment in the aesthetic zone.
- Understand how surgical procedures may improve treatment results in the aesthetic zone.
- Have a working knowledge of developing optimal soft-tissue contours with fabrication of custom provisional restorations.
- Identify the role provisional restorations play in developing optimal design features for definitive restorations.
- Make appropriate decisions regarding abutment and material selections in the aesthetic zone.

Vahik Paul Meserkhani, DDS

Dr. Meserkhani has lectured extensively on the subject of prosthodontics and implant dentistry both nationally and internationally. He received his implant surgical fellowship from Loma Linda University in 2003 followed by a Certificate in Prosthodontics and MSD degree in Prosthodontics specialty. He has numerous publications about prosthodontics and implant related subjects as well as a recent study at Loma Linda University about the accuracy of stereolithographic models. He is a Diplomate of the American Board of Oral Implantology, a Fellow of the American Academy of Implant Dentistry, and is Board eligible by the American College of Prosthodontics. He maintains a private practice limited to prosthodontics and implant dentistry in Glendale, California.

ADA CERP®

Continuing Education Recognition Program

Zimmer Biomet Dental is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at ADA.org/CERP.

Zimmer Dental Inc.
Nationally Approved PACE Program Provider
for FAGD/MAGD credits.
Approval does not imply acceptance by
any regulatory authority or AGD endorsement.
01/01/2019 to 12/31/2020
Provider ID# 208673

REGISTRATION AND CANCELLATION POLICY: Registration is limited to practicing clinicians. Zimmer Biomet Dental reserves the right to cancel or substitute this program.

TRANSPARENCY REPORTING: All payments and "transfer of value" items provided to health care providers will be reported as required by federal and state laws and regulations. "Transfer of value" items include meals and continuing dental education credits. *The fair market value of this complimentary program will be reported as required under any transparency laws applicable in your region. In the USA, the reportable value per credit hour is USD \$50.

DISCLAIMER: Participants must always be aware of the hazards of using limited knowledge in integrating new techniques or procedures into their practice. Only sound evidence-based dentistry should be used in patient therapy. The information in this course is of a general nature and does not represent or constitute medical advice or recommendations and is for dental education purposes only. Zimmer Biomet Dental does not practice medicine or dentistry. Each clinician should exercise his or her own independent judgment in the diagnosis and treatment of an individual patient, and this course and information does not purport to replace the comprehensive training clinicians have received.
