

Prosthetic Implant Complications: What Have We Learned?

ON-DEMAND WEBCAST

PROGRAM DESCRIPTION:

This program will illustrate through clinical examples, long-term success and failures associated with prosthetic implant restorations. Original concepts in diagnosis, treatment planning, and therapies will be compared to modern day treatment concepts and principles, especially regarding advances in equipment and technologies. Evidenced-based treatment successes will be illustrated for fixed, removable, and single-unit implant restorations.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Discuss the benefits and limitations associated with fixed, removable, and single-unit implant restorations in terms of long-term success.
- Discuss the advances in short- and long-term success of implant restorations based on evaluating past performance of implant restorations.
- Identify clinical procedures and implant components required for predictable and successful prosthetic implant restorations.
- List the steps and procedures needed in various clinical situations relative to the most common implant prosthetic procedures performed.
