

# CopiOs Extend<sup>®</sup> Membrane

Synergy Of Space And Time

## Space Maintaining Conformance

- Designed to conform to the defect with enough structural integrity for space maintenance

## Extended Resorption Profile

- Lasts 6 to 9 months,<sup>1</sup> designed to allow implant placement while providing ample time for regeneration

## Performs Even When Primary Closure Is Not Attained

- No signs of inflammation or infection in cases where primary closure has not been achieved<sup>2,3</sup>

# Long Lasting, Resorbable Collagen Membrane

## Performs When Primary Closure Has Not Been Achieved

Clinical experience with CopiOs Extend Membrane has shown that the membrane shows no signs of inflammation or infection in cases where primary closure has not been achieved. The exposed area is healed by soft tissue covering the exposure within a few weeks while the membrane maintains its barrier function.<sup>2,3</sup>

## Indications

CopiOs Extend Membrane is intended for use in oral surgical procedures as a resorbable material for:

- Use in augmentation around implants placed in immediate and delayed extraction socket
- Localized ridge augmentation for later implantation
- Alveolar ridge reconstruction for prosthetic treatment
- Filling of bone defects
- Guided bone regeneration in dehiscence defects
- Guided tissue regeneration procedures in periodontal defects

## Take A Closer Look

**Figure A** Clinical image showing the extensive bone loss on the palatal area extending past apex.

**Figure B** CopiOs Extend Membrane was laid over the graft and tacked under the flap.

**Figure C** Flap sutured over the membrane.

**Figure D** Two months postoperative.
